## Freelancing Projects:

**Project Title:** Fitness Website(<https://satyadur.github.io/gym/>)

**Description:** Fitness website is a dynamic website. It is used for the person's like those who are not have to pay for gym but they are trying to practice everyday for that people this website is very useful for them. It is developed with the help of HTML, CSS, Javascript, React, Redux and Rapid API. By using this website we can search any exercises and also we can know the details of the particular exercise not only this also we can see how to do the exercise, uses of this exercise and also we can see the exercises related videos.

**Project Title:** QUIZ website(<https://satyadur.github.io/Quiz/>)

**Description:** QUIZ is a website. Main reason for doing this website is for entertainment and gaining knowledge. It is useful for all the people. This is achieved by html, CSS , Bootstrap, JS and API.

**Project Title: Todo List**(<https://satyadur.github.io/todolist-in-react/>)

**Description:** This website is used for adding the todo's. In this we website we can add our name, photos, videos. We can also update the particular todo in the website. We can perform crud operations like save, update , read and delete. This is achived by using html, CSS, Bootsrap, JS and Redux.

**Project Title: Banking Website**(<https://satyadur.github.io/reactredux/>)

**Description:** It is a banking website used for deposit the money and withdraw the money. In this website we can also track the transactions. This is achived by using html, CSS, Bootsrap, JS and Redux.

#### Strengths:

- Positive Thinking. Hard Working and Dedication towards work.
- Strength to learn new techniques easily.
- Self-motivated and Self-confident.
- I am willing to work in teams and have patience to move along with people.
